Approvals

Hereby, **Pittway Sarl** declares that the radio equipment type T6H700RW is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address: **https://hwllhome.co/DoC**

RF (868MHz): Receiver Category 2, Max RF Power 25mW, 868–868.6MHz (868.3MHz)
Wi-Fi (2.4GHz): Max Power 100mW, 2.4–2.458GHz
ErP: Class V (+3%), (EU) 811/2013

ErP Class V +3% CE

⚠ **Must be installed by a competent person!**
Read these instructions carefully. Failure to follow these instructions can damage the product or cause a hazardous condition.

1 Turn OFF the power and remove the old thermostat

To ensure your safety, **always make sure mains power is switched OFF** before accessing wiring.

In case of removing the old thermostat be aware that the **existing wiring will no longer be used**

The T6R thermostat should not be placed near draughts, in direct sunlight or near heat sources. It should be at least 1.2 - 1.5 meters from the floor.

WEEE Directive 2012/19/EC
Waste Electrical and Electronic Equipment directive
At the end of the product life dispose of the packaging and product in a corresponding recycling centre. Do not dispose of the unit with the usual domestic refuse. Do not burn the product.
2 Prepare Receiver Box for installation

Before installation of the Receiver Box.

Find a suitable location near to the boiler. Leave at least 30cm distance from any metal objects including wallboxes and boiler housing.

Loosen the front screw to remove cover or tighten it when the cover is back in place.

Needed during installation:

● Cable with 2 wires from the boiler to Receiver Box.
● The Receiver Box requires 230V power.

3 Install the Receiver Box
⚠ Please refer to the wiring diagrams over the page

A) Wall box or Rear Wiring
Hinge open the terminal block flap to access the cables and wall box screw holes.

Max 6 mm | min 0.25mm²
max 1.5mm²

B) Surface wiring
Use the cable clamps to secure the surface wiring.

C) Replace the cover
Locate the hinges at the top of the cover and wall plate, close the cover and secure with the screw.
4 Install the T6 thermostat

The wall mounted power supply requires 230V power. Minimum wall box depth is 40mm.

A) Connect the 230V power wires to the power supply.

C) Connect thermostat wires to the terminals: Red to **+** and Black to **–** and close cover.

230V~
50-60Hz
N L

**B)** Using a screwdriver open wallplate terminal cover to connect wires

D) Attach the thermostat to the wallplate when finished.
5 Complete installation

Turn ON mains power to the Heating Appliance and Receiver Box. No binding needed, Receiver Box and Thermostat are pre-bound.

After powering up both devices the green LED is on.

Reset

Push one of the buttons to check if the valves are switching. Buttons light green.
SETUP

After power up, SETUP is displayed on the thermostat's screen.

⚠ To rebind the units, reset the Receiver box, then press the button for 3 seconds. The LED on the receiver box will blink yellow to indicate the box is in binding mode. On the thermostat press ☰ for 5 seconds to enter the advanced menu. Navigate to Binding, clear the current binding then bind the device again.

6 Set Up and configuration

1) Touch ⟩ to begin setting up the thermostat.

2) Select your language.
3) Set the clock format, time and date.

4) Select system type: Heating only or Heating + Hot Water.

5) Touch ⊗ to finalise setup.

(✓ to setup using the App is currently unsupported)

Once setup is completed, if you need to change more settings go to the advanced menu. To access the advanced menu press ☰ for 5 seconds.
5 sec

**In the advanced menu the following settings can be adjusted:**

Menu Item	Default	Options
LANGUAGE	English	0 = English, 1 = Français, 2 = Español 3 = Deutsch, 4 = Nederlands, 5 = Italiano
SYSTEM TYPE	Heat only	Heating only or Heating + Hot Water
OPENTHERM	-	OpenTherm boiler data when available
CYCLE RATE	6	3, 6, 9 or 12
MINIMUM ON TIME	1 minute	1, 2, 3, 4 or 5 minutes
HEAT RANGE	Min = 5.0ºC Max = 35.0ºC	Min: 5ºC to 21ºC, Max: 21ºC to 35ºC
SCHEDULE OPTIONS	Daily	1 = Daily schedule, 2 = 5+2 days schedule
OPTIMISE	Opt. start OFF Opt. stop OFF	Opt. start: 0 = off, 1 = on, 2 = Delayed start Opt. stop: 0 = off, 1 = on
CLOCK	Format: 24h Time: --:-- Date: 01/09/16	Clock format: 1 = 12h, 2 = 24h Setup time and date
LOW LOAD CONTROL	ON	0 = off, 1 = on
TEMPERATURE OFFSET	0.0ºC	-1.5 ºC to 1.5ºC
BINDING	-	Bind , check RF and clear bind.
RESET	-	Factory, schedule, WiFi and HomeKit reset
FAILSAFE	OFF	0 = off, 1 = on
