

V2880, Therafix Design

H-Block with Thermostatic Insert

With high quality surface for design radiators

APPLICATION

The V2880 Therafix Design thermostatic H-blocks have a high-class appearance to match design radiators.

The V2880 Therafix Design is used to connect design radiators with 50 mm connection distance to 2-pipe hydronic heating systems.

Together with a radiator thermostat they control the room temperature by regulating the flow of hot water into the radiator or heat exchanger.

The temperature of different rooms is controlled individually, and energy is saved.

V2880 Therafix Design H-Blocks of this type are suitable for

- Honeywell Home radiator thermostats with M30 x 1.5 connection and from an optical aspect especially the Thera-200 Design series

FEATURES

- For radiators with 1/2" internal thread
- Perfect finishing with high quality surface in chrome or white (RAL9016)
- Available in angled left, angled right and straight (right and left) pattern
- Including a chromed tail piece with integrated O-ring
- Functions: control, presetting, shut-off
- For 2-pipe systems
- Standard M30 x 1.5 thermostat connection
- Connections for all types of pipework available

Straight

Angled right

SPECIFICATIONS

Medium:	Water or glycol-water mixture, according to VDI 2035
pH-value:	8 - 9.5
Operating temperature:	2 - 100°C
Operating pressure:	PN10
Max. differential pressure:	100 kPa (1 bar, 14.5 psi) 20 kPa (0.2 bar, 2.9 psi) recommended for quiet operation
Body-head connection:	M30 x 1.5
Closing dimension:	11.9 mm
Stroke:	2.5 mm
Connection distance:	50 mm

CONSTRUCTION

Overview	Components	Materials
	1 Valve body	Brass EPDM 70 O-rings
	2 Radiator connection tailpiece with coupling nut and O-Ring seals	
	3 Insert cartridge with O-Ring seals for the axis and the body	
	4 Plunger support washer	
	5 Plunger seal	EPDM 70
	6 Spindle	Stainless steel
	7 Stroke-limiting dial, with O-Ring seals for the axis and the body	PA6 EPDM 70 O-rings
	8 Protection cap	PP
	9 Lockshield cartridge	Brass
	10 Lockshield cap	Brass EPDM 70 O-rings
	11 Lockshield plunger with O-ring seal	
	12 Secondary sealing	Fibre
Not depicted components:		
Restoring spring with retaining rivet		Stainless steel and copper river

FUNCTION

The V2880 Therafix Design connects individual radiators to the heating loop. Together with a radiator thermostat, the V2880 Therafix Design controls the amount of heating water flowing through the radiator depending on the ambient room temperature.

When the temperature increases the sensor inside the thermostat expands and acts onto the valve spindle of the thermostatic insert. The flow through the radiator is throttled. When the room temperature decreases the sensor contracts and the spring-loaded thermostatic insert opens again - more heating water can flow through the radiator.

The H-block can be shut off by the protection cap on the supply side and by the lockshield insert on the return side to isolate and e.g. remove the radiator.

TRANSPORTATION AND STORAGE

Keep parts in their original packaging and unpack them shortly before use.

The following parameters apply during transportation and storage:

Parameter	Value
Environment:	clean, dry and dust free
Min. ambient temperature:	0 °C
Max. ambient temperature:	50 °C
Max. ambient relative humidity:	75 % *

*non condensing

INSTALLATION GUIDELINES

Setup requirements

- To avoid stone deposit and corrosion the composition of the medium should conform with VDI-Guideline 2035
- Additives have to be suitable for EPDM sealings
- Ensure good access
- System has to be flushed thoroughly before initial operation with all valves fully open
- Any complaints or costs resulting from non-compliance with above rules will not be accepted by Resideo
- Please contact us if you should have any special requirements or needs
